Electromechanical drive for hinged doors

BEWEGUNG MIT SYSTEM

Automation with soundless ease

The electromechanical drive GEZE Slimdrive EMD for swing doors is a system full of concentrated technology which – like all products in the Slimdrive range – manages to do its job with a construction height of only 7 cm.

The reliable operation of the drive is achieved with a maintenance-free high performance motor with low wear characteristics and state-of-the-art control technology. An intelligent communication is possible through the CAN interface. It also means simple wiring, for example when double doors, doors to draught-lobbies or lobby controls are involved.

Therefore, if functionality, efficiency and low-noise disturbance are requested, the Slimdrive EMD is the ideal product to be installed. The range of applications is extensive: facilities, office buildings, hotels and even hospitals or nursing homes are possible areas of application.

Further product options:

- ▶ **GEZE Slimdrive EMD-F**
approved for the use on fire and smoke protection doors^{*)}
- ▶ **GEZE Slimdrive EMD F-IS**
approved for the use on fire and smoke protection doors^{*)}
and containing an integrated closing sequence control for double-leaf swing doors
- ▶ **GEZE Slimdrive EMD Invers**
particularly well suitable for escape and rescue routes
or smoke and heat extraction (RWA) installations

^{*)} by the German Institution for Construction Technology (DIBt)
